Firmware update instructions

## TQC WiFi Remote Control
LSP-FRTQC

CE

FIRMWARE UPDATE

1 First of all, you need to connect the device to a power supply before uploading. You can use a regular type-c charger or your computer's USB socket with a type-c cable.
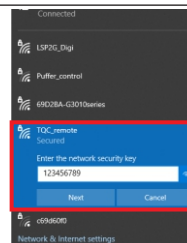

2 Press the button through the hole at the bottom of the device.
If the battery in the remote control is not completely discharged, the green LED will light up.

3 Turn on Wi-Fi on your pc/laptop.

Find the TQC_remote network.

4 Connect to the TQC_remote network.

The password of the network: **123456789**

5 Open a browser and enter the IP address **192.168.4.1/update** in the search bar.

6 After opening the website, this interface welcomes you, where you have to upload the latest firmware, you can simply drag&drop it.

7 After loading the firmware, uploading will start immediately. At the end, it says **OTA Success.**
